

ABOUT THE COVER LOW VISIBILITY GEAR

THE MODEL
NAME: Danny "Gator" Pritbor
OCCUPATION:
 Owner of Firebase
 Combat Studies Group

THE WEAPONS SYSTEM
LWRC PDW IC

With a collapsed stock position, the LWRC PDW IC in 5.56 has an overall length of 21 inches. This makes it very easy to conceal in an average-sized daypack. It also makes for a very handy platform when deploying and maneuvering inside of a vehicle. With the M4 manual of arms, and the penetration capability of 5.56 caliber, it makes this package hard to beat, especially when compared to submachine guns such as the 9mm HK MP5.

THE PACK

The pack selected for this piece is the Arcteryx Khard 30 pack. It easily conceals all of the 3rd Line Equipment (see below), to include the LWRC PDW IC. The rifle concealed best with a Magpul 20-round magazine, allowing for a snag free draw from the bag.
